

## The surveys

The Montenius ski area valuation aims to reflect the perception of those for whom it is made: skiers and snowboarders who are the customers of the ski areas.

Therefore, various aspects of the valuation are based on the results of surveys in which you can participate as well. By participating, you help us refine the valuation system and make it an even better reflection of reality. Participation is, of course, completely anonymous.

Under the following links you will find surveys on the three main aspects of the Montenius ski area valuation:

- [Survey on ski area size](#)
- [Survey on ski area comfort](#)
- [Survey on snow reliability](#)

For the latest results please click here:
